HANDBOOK OF ADOLESCENT PSYCHOLOGY

Physical changes of puberty mark the onset of adolescence (Lerner & Steinberg, 2009). For both boys and girls, these changes include a growth spurt in height, growth of pubic and underarm hair, and skin changes (e.g., pimples). Boys also experience growth in facial hair and a deepening of their voice.

Chapter 7: Adolescence - Lifespan Development

"There are two main features that seem to distinguish teenagers from adults in their decision making," says Laurence Steinberg, a researcher at Temple University in Philadelphia. "During early adolescence in particular, teenagers are drawn to the immediate rewards of a potential choice and are less attentive to the possible risks.

Peer Pressure: Its Influence on Teens and Decision Making ...

Physical Development during Adolescence Puberty Begins. Puberty is the period of rapid growth and sexual development that begins in adolescence and starts at some point between ages 8 and 14. While the sequence of physical changes in puberty is predictable, the onset and pace of puberty vary widely.
