Advanced Life Support Obstetrics Manual

Advanced cardiac life support, or advanced cardiovascular life support, often referred to by its acronym, "ACLS", refers to a set of clinical algorithms for the urgent treatment of cardiac arrest, stroke, myocardial infarction (also known as a heart attack), and other life-threatening cardiovascular emergencies. Outside North America, Advanced Life Support (ALS) is used.

Advanced cardiac life support - Wikipedia

Advanced trauma life support (ATLS) is a training program for medical providers in the management of acute trauma cases, developed by the American College of Surgeons. Similar programs exist for immediate care providers such as paramedics. The program has been adopted worldwide in over 60 countries, sometimes under the name of Early Management of Severe Trauma, especially outside North America.
