5 Survey developers also frequently use focus groups to pretest topics or ideas that later will be used for quantitative data collection. In such cases, the data obtained are considered part of instrument development rather than findings. Qualitative evaluators feel that this is too limited an application and that the technique has broader utility.

1. History. Aristotle's distinction between the public sphere of politics and political activity, the polis, and the private or domestic sphere of the family, the oikos, as two distinct spheres of life, is a classic reference to a private domain. The public/private distinction is also sometimes taken to refer to the appropriate realm of governmental authority as opposed to the realm reserved ...
