Engineering is the use of scientific principles to design and build machines, structures, and other items, including bridges, tunnels, roads, vehicles, and buildings. The discipline of engineering encompasses a broad range of more specialized fields of engineering, each with a more specific emphasis on particular areas of applied mathematics, applied science, and types of application.

Engineering - Wikipedia

A time limit or deadline is a narrow field of time, or a particular point in time, by which an objective or task must be accomplished. Once that time has passed, the item may be considered overdue (e.g., for work projects or school assignments). In the case of work assignments or projects that are not completed by the deadline, this may adversely affect the employee's performance rating.

Time limit - Wikipedia

Walt Whitman Rostow's 1960 model of stages of economic growth describes how societies become modern, industrial economies over five separate stages. The "take-off" stage, which is the third step, describes the moment when societies move toward full industrialization in certain specific ways, such as technological innovations, urbanization ...
