Engineering controls are strategies designed to protect workers from hazardous conditions by placing a barrier between the worker and the hazard or by removing a hazardous substance through air ventilation. Engineering controls involve a physical change to the workplace itself, rather than relying on workers' behavior or requiring workers to wear protective clothing.

A fire is one of the worst things that can happen on a boat. West Marine stocks multiple types of fixed fire extinguishers and portable fire extinguishers. Handheld fire extinguishers should be secured on your boat in a well-known, easy-to-access location, preferably in the engine room or other locations where fires are most likely to start. They come in B-I fire extinguishers, B-II fire ...

The single worst industrial accident in history occurred on December 3, 1984, when some 45 tons of the dangerous gas methyl isocyanate escaped from the Union Carbide plant in Bhopal, India. The gas drifted over the densely populated neighbourhoods around the plant, killing thousands of people immediately and creating a panic as tens of thousands of others attempted to flee Bhopal.

5. Analyse and optimize industrial robot actions. Industrial robots such as UR+ robots make repetitive work easy. Remote access and IIoT features are used to remotely change robot program actions for changeovers or to get insight into the log files and data of the robot for troubleshooting. In this video you'll see a project where an IIoT platform with an industrial robot was being used.

Impact of the Industrial Revolution. With all the advantages of the Industrial Revolution that provides us with goods, services and opportunities unavailable to past generations, there are downsides, too. There is a much greater inequality in wealth, with some super-rich people while others live below the poverty level.
